

KIRAN KUMAR SWAIN

📍 Bangalore, Karnataka, India — ✉ kiranswain67@gmail.com — 📞 +91 7328820904
🌐 LinkedIn — 🏠 GitHub

Professional Summary

Recent B.Tech Computer Science graduate skilled in Python, SQL, Data Analytics, Machine Learning, Power BI, Excel, and Business Intelligence. Completed 3+ projects across sales analytics, health prediction, and student burnout detection. Experienced in data cleaning, exploratory data analysis, dashboard development, KPI reporting, feature analysis, model training, model evaluation, and Streamlit application development.

Technical Skills

Programming: Python, SQL, C

Business Intelligence: Power BI, Power Query, DAX, Data Modeling, KPI Reporting, Dashboard Development

Excel: Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting

Data Analytics: Data Cleaning, ETL, EDA, Data Visualization, Business Analysis

Machine Learning: Classification, Regression, Model Training, Model Evaluation

Databases: MySQL, Joins, Aggregations, GROUP BY, HAVING Clause

Generative AI: LLMs, Agentic AI, AI Agents, Retrieval-Augmented Generation (RAG), Prompt Engineering

Libraries & Tools: Pandas, NumPy, Scikit-learn, Git, GitHub, Jupyter Notebook, VS Code

Experience

AI & Data Analytics Intern — Rooman Technologies Pvt. Ltd.

Feb 2026 – May 2026

- Analyzed 3+ structured datasets using Python, Pandas, NumPy, Excel, SQL, and Power BI to identify trends, patterns, and business insights.
- Cleaned and transformed raw data across 4+ project tasks using preprocessing, visualization, KPI reporting, and dashboarding techniques.
- Improved business reporting by analyzing prediction results, performance metrics, and error patterns across 4+ analytics tasks.

Machine Learning Summer Training Program — PMEC, Berhampur

Jun 2023 – Jul 2023

- Practiced 5+ ML concepts including preprocessing, train-test split, classification, regression, prediction analysis, and model comparison.
- Built and optimized classification and regression models using Scikit-learn, comparing algorithm performance through validation techniques and predictive analysis.

Projects

PhonePe Pulse: End-to-End Business Intelligence Dashboard — Power BI, Power Query, DAX

- Built an interactive Power BI dashboard using 300K+ transaction records and 110K+ user records after ETL and data transformation.
- Designed a Star Schema, Date Table, and 15+ DAX measures for KPI reporting, MoM, YoY, and transaction analysis.
- Delivered interactive dashboards with KPI cards, slicers, drill-through, and charts to generate business insights.

Blinkit Sales & Operations Analytics Dashboard — Power BI, Excel

- Analyzed 8K+ sales records to evaluate outlet performance, product categories, customer ratings, and overall sales trends.
- Implemented 10+ interactive visuals, including KPI cards, charts, slicers, and filters, to monitor key business metrics.
- Identified high-performing outlets and product categories through sales trend analysis, enabling data-driven business decisions.

Heart Disease Prediction Using Machine Learning — Python, Scikit-learn

- Applied data preprocessing, feature engineering, and Logistic Regression to analyze 13 clinical features for early heart disease prediction.
- Achieved 85.12% training accuracy and 81.97% testing accuracy with 82% precision, 84% recall, and an 83% F1-score.
- Evaluated model performance using confusion matrix, precision, recall, F1-score, and feature importance analysis to improve prediction reliability.

Education

Parala Maharaja Engineering College (PMEC)

2022 – 2026

B.Tech in Computer Science & Engineering

Berhampur, Odisha

Khemundi College, Digapahandi

2022

Higher Secondary Education

Ganjam, Odisha
